

WE THINK
YOU LIVE
BETTER BETTER

ELVIRA

A SENSIBLE SWITCH

DISCOVER
THE THINKING
THAT GOES INTO
MAKING LIFE
BETTER.

Before we started creating a top quality switch, we put you at the centre of our thinking. And while this seemed easy, the thought that

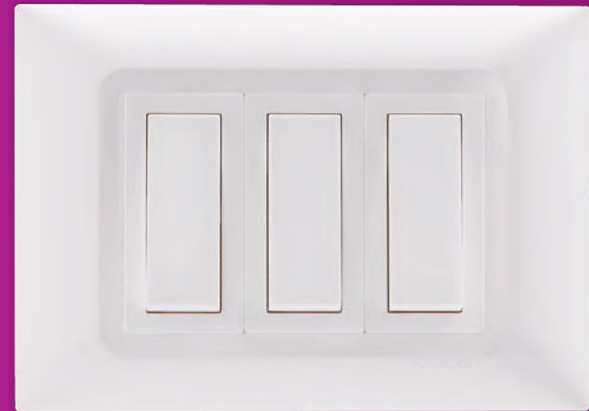

went into creating a superior-quality, longer lasting, greater value-for-money product wasn't an easy task. We focused on attributing it with better features and better functionality, but more importantly, making it more practical. And when it all came together, it just made the best sense.

Elvira: A Sensible Switch.

Because at IndoAsian, *everything* **Makes Sense.**

FEATURES

There are so many reasons why Elvira is the right choice for you. We've listed 12 sound and sensible ways in which Elvira can help you live better. We're sure you will be able to find 12 more.

DESIGNED FOR YOU

Neutral, white colour

Everyone prefers pure and bright white, not because it's simply a better choice but because it's more elegant. It gives you more options and the flexibility to change wall colours.

Built to last

Elvira is also designed to last longer. From curved, screw-free exteriors, to honeycomb base plates, there are even flexible clips for greater stability and strength.

COMPLETELY
COMPATIBLE

Simple 3 pin design

Loose connections are now a thing of the past. The simplified three-pin design has flat and round terminals which means compatibility with all 2 and 3 pin plugs.

SERIOUSLY SAFE

Shrouded terminals

This minimises exposure from accidental contact with live screws and terminals during installation for the electrician.

Base shutters

We've moved the shutter from the top round hole to the base, thereby needing contact from both plug pins and giving complete protection to the curious child.

TOTALLY TRUSTWORTHY

Quality standards

There's a reason why IndoAsian is preferred; the ISI mark is a universally-recognised quality standard. Rigorous testing exceeding 1 lakh On/Off operations means that our switches will last you more than a decade.

HIGHLY DURABLE

High-grade Polycarbonate switches

Our Polycarbonate switches are FR grade with sun protection. They are heat-resistant, flame-retardant and even UV-stabilised. The high grade of Polycarbonate that we use adds to the structural stability.

EXTRA EFFICIENT

Detailing for installation

Behind every switch we've indicated which side is Top, which means your electrician will always install the products correctly. No mixing up of directions, no time wasted.

EFFECTIVELY POWERED

ELVIRA
A SENSIBLE SWITCH

11

Unique indicator switches

Our indicator switches are powered with LED, which implies longer life and less energy consumption.

The unique indicator design delivers brightness greater than neon indicators, making it even more efficient.

TRULY PERMANENT

Laser-etched switches

Laser technology replaces printing and painting for easy identification of product ratings and descriptions. All our switches are permanently etched in high-contrast, clear figures and letters that are guaranteed to last long.

The Elvira wiring system consists of switches, sockets and indicators that are functional, yet packed with features. This high-quality range extends to more products that simply improve your life. This includes separate dimmers and fan regulators that aren't interchangeable, call bells and push bells with indicators, skirting lights, and 25A sockets and motor starters.

INSTALLATION PROCESS

Installing a sensible switch is a simple process.
Here's how:

Fix the metal box either
into or on the wall.

Press-fit the switch and
socket into the base frame.

Connect the wires
to the switch and socket.

Fix the connected and
wired base frame to the metal box.

For a smooth and seamless look,
press-fit the cover plate to the base frame.

INDOASIAN  TM
MAKES SENSE

Glint TM
**WELCOME
CHANGE**

WELCOME CHANGE

Today's India is filled with new experiences. From entertainment to transportation and food, the modern Indian wants to try out all that's new. And every experience, no matter how small, brings you into a new world and changes your lifestyle for the better.

At IndoAsian, we have always derived inspiration

from your needs and are always looking to create products that will serve you best. Our 58 years of service in safeguarding India with protection products, is testament to our belief. By keeping in sight your passion for change, we present to you our all new range of wiring accessories - Glint.

A good-looking package of convenience, flexibility and performance, it brings a spark of change to your lifestyle. Glint will add a shine to your walls, without burning a hole in your pocket!

So go ahead, switch to the brighter side of life. Switch to shine. Switch to Glint and welcome change!

MODULARITY

Discover the magic of a modular range with Glint. Designed to perfection, its curved edges and screw-less finish will light up your rooms. The gleaming white colour sparks style, while the glossy finish brightens every wall, no matter what the colour. Its modularity gives you the convenience to install it at the snap of your fingers; it's hassle-free and also easy. With Glint, you can enjoy both ease of installation, and the charm of simplicity, at the same time.

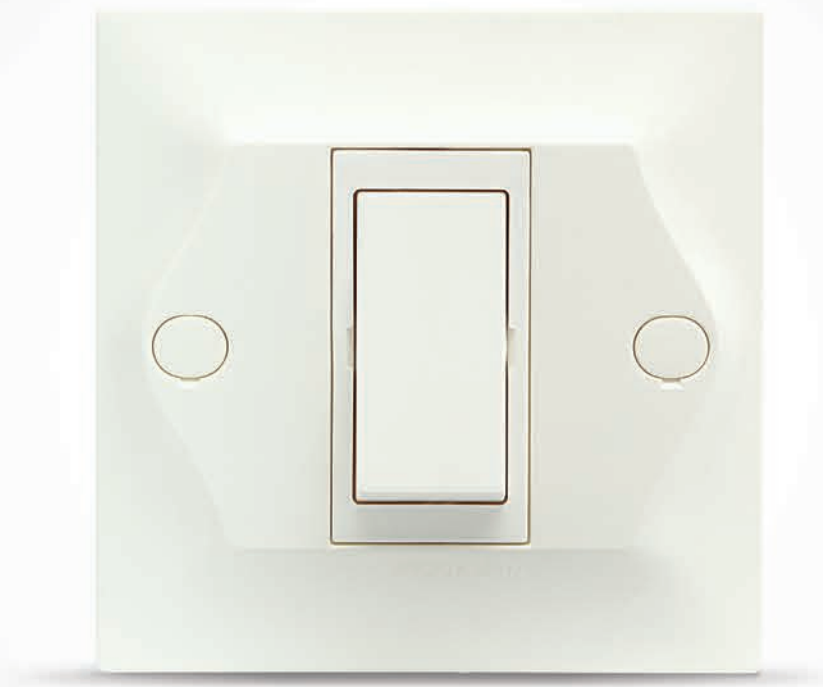

SAFETY

We know that the safety of your loved ones comes first. That's why all our Glint switches are fire-retardant, and the sockets have safety shutters, making them shockproof. Compatible with all plugs, Glint sockets also come with a special feature of pencil-free operation, which ensures freedom from scratches and marks, and most importantly, guarantees peace of mind.

QUALITY

Good looks demand great quality. Glint switches are made of quality PC material and components that add a glossy finish to all your walls, no matter what the colour. Its UV-resistant material ensures that the brightness lasts, and never grows dull. And with an ISI certification you can be sure that along with the good looks, you are also guaranteed complete safety.

EASY IDENTIFICATION

A modern range comes with modern technology.

Our Glint regulators come with a special laser marking that makes identification easy and adds to the beauty of the design.

And guess what, it lasts even longer than printed markings!

FLEXIBILITY

Glint, the all-new modular range, offers you the freedom of flexibility. You can customise the plates as per your convenience or even leave a blank module or two to replace in the future. There's no need to change the entire unit; instead just replace the blank module with the required switch or socket. Save on time, save on money.

RANGE

Glint offers a wide spectrum of products ranging from switches and sockets, to RJ 11, RJ 45, buzzers, 32 DP, and much more. The entire Glint range is UV-resistant, ensuring that your walls stay gleaming, always.

VALUE FOR MONEY

Glint is a modular range that brightens up your walls with a gleaming white colour that complements all hues, while transforming your home with its modern looks. It offers quality as well as convenience, and most importantly, does so at an affordable price.

EASE OF INSTALLATION

Modular switches, while being flexible and good-looking, save more than half your installation time. The Glint modular range is very easy to install. With just a simple mechanism they'll adorn your walls even before you know it.

LED INDICATOR

The Glint modular range also offers switches with LED indicators. All LED indicator switches are long-lasting and use less electricity. They indicate the ON/OFF position of the switches and also their working condition.
